Default Question Block

Observer Name

Date

Team ID

Operational Definitions:

Agreement is observed when the user:

- Explicitly accepts AI advice (e.g., 'Yes, I'll do that').
- Proceeds without providing a secondary response or challenge.
- Implements the AI's suggested action without modification.

Disagreement is observed when the user:

- Chooses a different path or option than the AI.
- Suggests alternative options or corrections.
- Explicitly questions, rejects, or critiques the AI's recommendation.
- Ignores the recommendation and proceeds independently.
- Does nothing!

Dissent Expressed

A participant verbally or behaviorally communicates disagreement, doubt, or concern about the AI recommendation or the group's emerging

decision.

Code yes if ANY of the following occur:

- Explicit disagreement
- Questioning the AI or group decision
- Suggesting a different option
- Hesitation paired with concern

Code no if:

- No objection is voiced
- Silence or immediate agreement
- Only procedural talk (e.g., “okay next”)

Dissent Ignored / Suppressed

An instance where expressed dissent is dismissed, overridden, not acknowledged, or discouraged, either by teammates or by interaction dynamics.

Code yes if ANY of the following occur:

- Dissent is ignored (no response, conversation moves on)
- Dissent is dismissed
- Dissent is overridden quickly o decision proceeds without engagement
- Social pressure discourages dissent o tone, interruption, or

dominance shuts it down

Code No if:

• Dissent is discussed or considered

• Group engages with the objection before deciding

Alternative Options Discussed

The group actively considers options beyond the AI's recommendation, through discussion or suggestion.

Code yes if ANY of the following occur:

• At least one alternative is proposed

• Multiple options are compared

• Pros/cons of different choices are discussed

Code No if:

• Only the AI option is discussed

• Group moves directly to decision without exploring alternatives

• Alternatives exist but are not verbalized

Final Decision Source (AI / Human / Mixed)

The primary origin of the decision that the group ultimately implements.

Code:

AI

- Decision directly follows AI recommendation
- No meaningful modification or challenge
- Group adopts AI's option as-is

Human

- Decision originates from a human teammate
- AI suggestion is ignored or overridden
- Final choice differs from AI recommendation

Mixed

- Decision emerges from combination of AI + human input
- AI suggestion is modified or refined
- Group integrates multiple perspectives before deciding

	Timestamp	AI Recommendation	Agreement with AI (Yes/No)	Disagreement with AI (Yes/No)	Dissent Expressed (Yes/No)	Diss ignored/su (Yes/
Calm/Rebuke						
Keep/Give to Matt
